

# HHV-6

## FOUNDATION

Set:	HHV-6 Infected Cell Lines
Reagent:	CBMC / ENO
Virus:	HHV-6B (ENO)
Cell count:	N/A
Contributor:	Yamanishi, K. Laboratory of Virology, Division of Biomedical Research, National Institute of Biomedical Innovation. Japan.
Description:	Cord blood mononuclear cells infected with HHV-6B ENO strain. This strain was originally obtained in 1988 from a patient with exanthem subitum by Yamanishi et al.
References:	Yamanishi K, Okuno T, Shiraki K, Takahashi M, Kondo T, Asano Y, Kurata T. Identification of human herpesvirus-6 as a causal agent for exanthem subitum. Lancet. 1988 May 14;1(8594):1065-7.
Special Notes:	This strain can be adapted to grow in MOLT-3 cell lines.
NIH Status:	Not acquired
MTA Required:	Yes
