

IKDT GmbH, Moltkestrasse 31, D – 12203 Berlin

IKDT HHV6 Testing – Infertility (Endometrial Biopsy or PBMCs)

Panel Nr.	Workpackages HHV6 testing-infertility	Costs according to GOÄ ¹
	Molecular Virology	
1	HHV-6A DNA Infertility Panel² (incl. DNA isolation, ultrasensitive nested- and QPCR ⁶ , HHV-6 A/B typing)	440,77 €
2	HHV-6 Diagnostic Panel³ (ultrasensitive nested- and QPCR ⁶ , incl. nucleic acid isolation) <i>in case of HHV6 DNA positivity (Diagnostic Panel 2):</i>	376,57 €
3	HHV-6 mRNA Panel and HHV6 A/B Typing^{4,5}	430,11 €
	(Immuno-)Histological analysis	
4	Immunohistological examination incl. digital imaging analysis (2 virus antibodies)	202,02 €
5	Histological and immunohistological examination incl. digital imaging analysis	366,70 €
	1. GOÄ - German Reimbursement Catalogue for Medical Services	
	2. <i>HHV-6A DNA Infertility Panel</i> includes HHV6 detection by PCR and typing of HHV-6A or B, no RNA analysis	
	3. <i>HHV-6A Diagnostic Panel</i> is requested for routine diagnostics of HHV-6 infection, includes HHV6 detection by PCR, no typing HHV-6A/B	
	4. In case of positivity (3.) HHV-6 mRNA Panel and HHV6 A/B typing is recommended	
	5. HHV-6 mRNA test differentiate between active and latent infection or determines viral activity	
	6. QPCR allows detection of chromosomally integrated HHV-6 (ciHHV-6)	

Recommendation for sample fixation and transport:

PBMCs: EDTA-blood (10 ml) transport overnight –ambient temperature or +4°C

Endometrial biopsy: fixation in *RNAlater*, transport overnight –ambient temperature
