

HHV-6 FOUNDATION

Set:	HHV-6 Late Antigen Antibodies
Protein Name:	p180
Clone Name:	4A6
Specificity:	HHV-6A and HHV-6B
Dilutions:	IFA: (Biocell tittered supernatent, not pure ascites we have at the NIH, needs retiter after NIH sends)
Concentration:	purified ascites, 0.39 μ g/ μ l
Contributor:	Balachandran N. Department of Microbiology and Immunology, Rosalind Franklin University of Medicine and Science.
Description:	Mouse monoclonal antibodies for the detection of HHV-6A/HHV-6B replication in cells and tissues and to purify the antigen.
References:	Balanchandran N, Amelse RE, Zhou WW, Chang CK. Identification of proteins specific for human herpesvirus 6-infected human T cells. J Virol. 1989 Jun;63(6):2835-40.
Special Notes:	There is no cross reactivity with other herpesviruses.
NIH Status:	Acquired
MTA Required:	No
